DETAILED ACTION

1. The following is an examiner's statement of reasons for allowance: The prior art shows a rotor for an electric motor having a magnet with a rotation axis, the magnet being provided with a through hole having opposite ends and extending coaxially with the rotation axis and a shaft fixed concentrically to the magnet. However, the prior art fails to show, in combination with the invention and light of the specifications and translation of the foreign Japanese application granting foreign priority, the shaft having a stepped outer surface and including a first portion fitted in the through hole and the first portion having an axial interengagement length from one of the opposite open ends that is in engagement with an inside surface of the through hole and that is shorter than an axial length of the through hole, a second portion thinner than and adjacent to the first portion and that is not in engagement with an inside surface of the through hole and a toothed wheel adjacent to an end of the first portion opposite from the second portion and reinforcing means provided at least inside the through hole for securely fixing the shaft in a predetermined position in the magnet and inserting a first and second portions of the shaft into the through hole of the magnet which is tightly press-fit with a coating while the second portion of the shaft is not in engagement with the coating.

Also, the prior art fails to show that the magnet comprises an annular bonded magnet material and the reinforcing means comprises a metal plating formed on an inside surface of the through hole of the magnet material and the first portion of the shaft is engaged with the coating in a face-to-face manner

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Julio C. Gonzalez whose telephone number is (703) 305-1563. The examiner can normally be reached on M-F (8AM-5PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nestor Ramirez can be reached on (703) 308-1371. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-7722 for regular communications and (703) 308-7722 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
